

With a single addition, we were able to tie 2 existing separate buildings and the new construction into a single enclosed structure. The project included a 12,500 SF addition/infill, remodel of the existing classroom and office wings, and expansion of seating in the sanctuary. We also doubled the existing parking lot and provided a new covered entry facing it.

The addition included a new 4500 SF foyer, new toilet rooms and a new multipurpose fellowship hall with commercial kitchen and stage.
