

Exterior View At New Main Entry

Exterior View At Addition Corner

We designed a 9,460 square foot, two-story addition to include an administration suite and multi-purpose space on the main level, and classrooms on the lower level. The renovations resulted in a new foyer on the main level. The addition blends seamlessly in with the existing building.

Winner of the Associated Builders & Contractors Of Western Washington's 2004 Excellence In Construction award for Tenant Improvement/Renovation.
