

Exterior View from Street

Sanctuary Interior

Foyer Interior

We designed a new facility for this client and developed Phase I to allow expansion for a fellowship hall to the south of the kitchen, and a classroom wing to the west of the storage room between the 2&3 and 4 year old classrooms. The narthex serves as a gathering place, overflow for the sanctuary, and temporary fellowship hall. The operable wall between the sanctuary and narthex also allows overflow into the sanctuary for the fellowship functions.
