

Rendering at Entrance

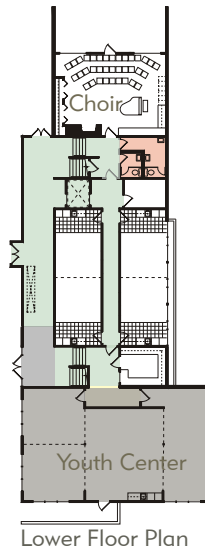

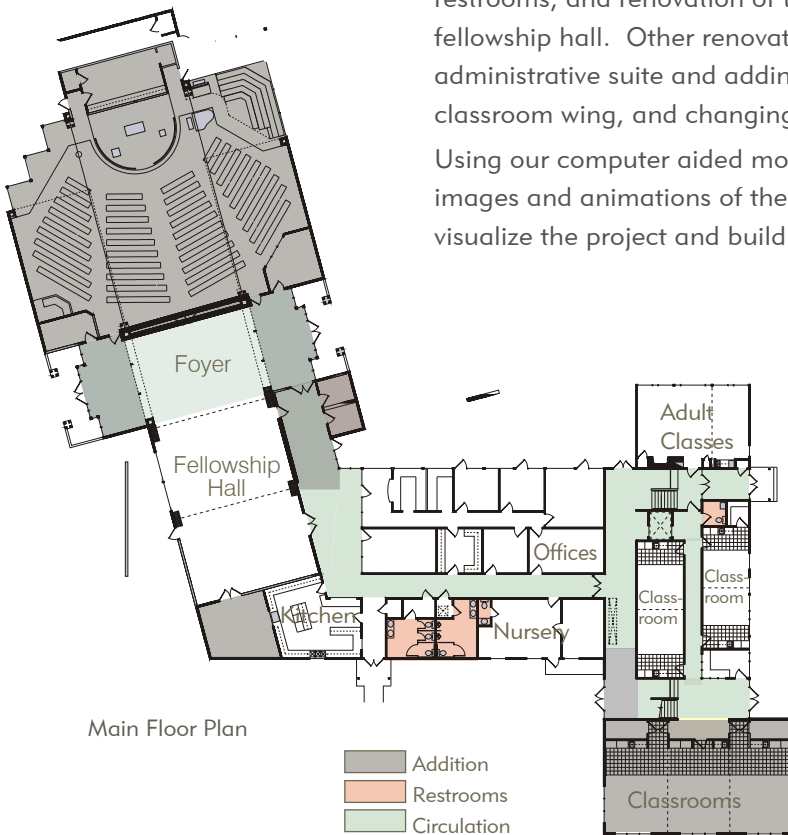

Exterior View at Sanctuary Addition

Interior View Towards Altar and Windows

This project includes a new 330-seat sanctuary, extensions of the foyer, accessible restrooms, and renovation of the existing worship space into a multi-purpose foyer / fellowship hall. Other renovations included changing a small fellowship hall into an administrative suite and adding storage space. Future projects include a new two-story classroom wing, and changing existing office space into classrooms.

Using our computer aided modeling and rendering program we were able to create still images and animations of the proposed interior and exterior to allow the congregation to visualize the project and build enthusiasm for the design.

Stained Glass In Sanctuary
