

Fellowship Hall Interior

Aerial with model inserted

Bird's eye view of both additions

Exterior view of both additions

Our second phase for St. Mark's Lutheran included a new fellowship hall and remodel of the existing fellowship hall into gathering space and classrooms. The lower floor includes a new preschhool.

As a way to help neighbors visualize the size and scope of the addition, we modeled the building in the computer and actually inserted the model into an aerial photograph of the site.
