

Multi-Purpose Room In Sports Layout

Youth Cafe

Upper Level Floor Plan

Lower Level Floor Plan

This 2 story addition includes an inviting multipurpose fellowship hall / gymnasium with a full commercial kitchen and foyer expansion on the main floor. The lower level is a large youth assembly area with classrooms and a 1950's diner / café style lobby.

The 22,600 SF addition also was designed to provide a "heart" for a building that had been added onto over the years and had become spread out over the site. We were able to limit change orders (3% mainly because of scope changes) by working with a negotiated contract and team approach to the project.
