

Phase II Addition

Exterior Detail

Multi-Purpose Room

Phase II contains a large multi-purpose room, which can be divided into classrooms or opened up for use as a fellowship hall or banquet facility.

Phase I for Gateway Fellowship (formerly known as Christ Memorial Church) was one of our very first church buildings, and included a 1,000-seat worship space, a small administration space, daycare, and a chapel.

This phase also includes an administration wing, classroom wing, and a renovated and enlarged nursery. The new building is designed to be clearly a part of the existing church complex, yet be a distinctly contemporary statement.
